SIM registration designed to protect public from indiscriminate, illegal use of cellular phones

Starting Dec. 27, 2022, all users of Subscriber Identity Module (SIM) cards — or smart cards that store identification information that pinpoint a smartphone to a specific mobile network — were required to register such numbers. Public telecommunication entities (PTEs) are required to establish secure online SIM registration platforms for this purpose.

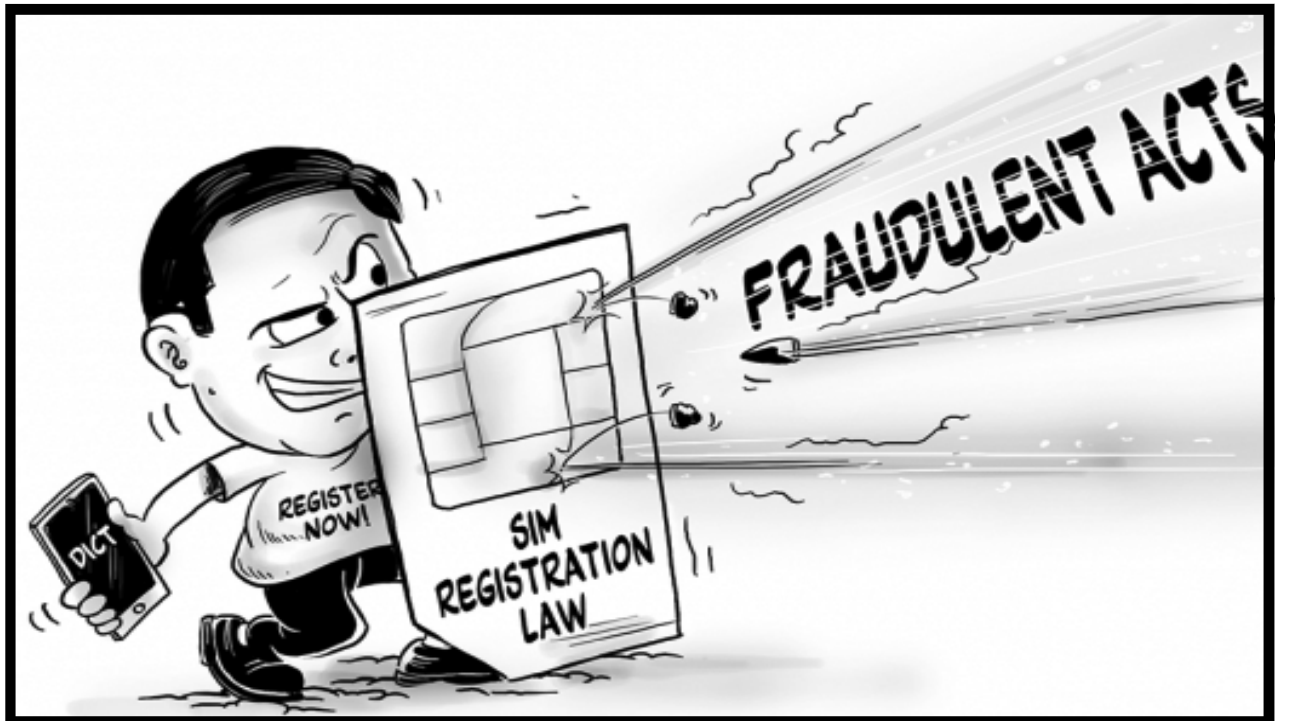

Starting Dec. 27, 2022, all new SIMs will be deactivated and only activated after the user completes the registration process.

Republic Act No. 11934, commonly known as the SIM Registration Act, makes it easier for law enforcement agencies to pinpoint any individual engaging in cybercrime or similar illegal activities, thereby making it easier to investigate and prosecute the offender.

SIM registration involves attaching an individual's personal information to a SIM card. A database containing SIM owners with unique identifiers can make it easier for authorities to track someone behind any suspicious or criminal activity.

SIM users, both for physical and embedded SIMs, are required to register until June 22, 2023. They must register existing SIMs within this period to avoid the deactivation of the SIM, but if they are unable to register with a valid reason, they could ask the DICT for an extension. Once approved, they will have until Oct. 20, 2023, to complete the registration process.

Recall that the clamor for the enactment of a SIM registration law was prompted by law enforcement authorities who noted an upsurge in scams and cybercrimes perpetuated through the use of burner phones, inexpensive mobile phones designed for

temporary, sometimes anonymous, use, after which these may be discarded. Burners are purchased with prepaid minutes and without a formal contract with a communications provider. Prepaid phone users pay only for the services they plan on using, and could easily discard such phones. Hence, this was deemed inimical to public safety and needed to be placed under closer law enforcement monitoring.

Postpaid mobile phone users, on the other hand, are specifically identified, as they pay for services used during a monthly billing cycle. They are registered as PTE subscribers. The new law still requires postpaid subscribers to validate and update their registered personal data. This will be done online and facilitated by their respective PTEs.

Since the announcement on SIM registration, Manila Bulletin's Technology section has responded to frequently asked questions (FAQs). Most of these questions reflect

concerns on privacy and confidentiality. The SIM Registration Act reiterates the government's commitment to guarantee both privacy and confidentiality of information. Fines ranging from not less than ₱500,000 to not more than ₱4 million shall be imposed on telecommunications companies for breach of confidentiality. No leak on SIM registration information will be coming from government as it will not keep such data.

Sale or transfer of a registered SIM is also strictly regulated; violations are punishable with imprisonment ranging from six months to six years, or a fine ranging from ₱100,000 to ₱300,000, or both, would be meted out against violators of the rules on registration.

Hopefully, the SIM Registration Act will severely curtail, if not totally eliminate, misdemeanors or crimes attributable to the use of previously unregulated mobile phones.

In its report to Malacañang, the DPWH said it deployed more than 7,000 personnel as the government responded to several disaster areas brought about by earthquakes and the successive typhoons that hit the country this year.

Aside from personnel deployment, the DPWH also dispatched 1,711 pieces of equipment and cleared 168 road sections in multiple provinces from Luzon to Mindanao.

Responding to the President's call to build high-quality and efficient infrastructure, the DPWH said in its accomplishment report that it has so far constructed, maintained and rehabilitated 1,105 kilometers of roads from July to November this year.

The DPWH's major infrastructure projects include the Cavite-Laguna Expressway, NLEX-SLEX

Connector Road, Central Luzon Link Expressway, Cavite de Oro River Flood Management project, Samar-Pacific Coastal Road and the Mindanao Growth Corridor Road Sector Project.

Also on the DPWH list are road network development projects in conflict-affected areas in Mindanao, Laguna-Lakeshore Road Network, Bataan-Cavite Interlink Bridge, Pangul Bay Bridge, Samal Island-Davao City Bridge and the Davao City Bypass Construction project.

The agency's key priority programs under the administration's 8-point socioeconomic agenda include a traffic decongestion program through the construction of high-standard highways and expressways, bypasses, diversion roads, flyovers and interchanges.

The DPWH is also actively involved in the Integrated and Seamless Transport System Program such as improving the Daang Maharlika, construction of inter-island linkages and mega bridges, and connecting gaps along national roads.

Through its Rural Roads Convergence Program, the DPWH will construct and upgrade access roads leading to tourism destinations, industry and trade corridors, RORO ports, airports and railway stations.

To support the Agri-infrastructure Support Program, farm-to-market and farm-to-mill roads will be built, based on the DPWH program.

The DPWH also has programs on flood management, water management and basic social infrastructure support that will create more livable, sustainable and resilient communities.

DOST 10...

With the use of PORTASOL, they can now dry their grains and other products like fish, squid and fruits much easier and faster. These commodities can further be dried even during overcast days that are common during the country's rainy season. Utilization of portasol can ensure product quality, food hygiene and safety while minimizing production cost.

The trays are made of aluminum which is a good conductor of heat, a critical factor in drying grains. Through the use of Portasol, drying is achieved 50-75% faster. A unit of portasol has 12

trays which can load at least ¼ cavan or approximately 12-13 kilogram of palay, fish and fruits per tray.

Traditionally, farmers and food processors dry rice grains, fish and fruits on the road and pavements thereby incurring post-harvest losses and contaminations. As a solution to that, Filipino inventor Francisco Pagayon of the Filipino Inventors Society Inc. invented PORTASOL, a multipurpose solar dryer that is stackable, clean, and space-efficient and is specifically designed to reduce the moisture

content of large volumes of produce.

The project is implemented under the CEST or Community Empowerment through Science and Technology program of the DOST with a total funding assistance of 1.825 Million. (Nice Nerjay Callo/DOST Camiguin)

The Department of Science and Technology – Region 10 (DOST 10) envisions to be an effective and competent catalyst of inclusive development by providing world-class and innovative Science & Technology services in Region 10.

Community welfare programs

Patuloy ang MPT South sa paghahatid ng tulong sa mga komunidad nito lalo na sa mga nasalanta ng iba't-

Isa rin sa mga milestone ng MPT South ang paglulunsad sa isang makabagong paraan para lutasin ang problema ng mga pagala-galang hayop sa expressway. Nitong taon, katuwang ng toll road company ang Philippine Animal Welfare Society (PAWS) para sa programang tinawag na "Love Pets Save Lives" kung saan aabot sa 863 na alagang aso at pusa (aspin at puspín) ang naserbisyuhan ng libreng kapon. Nagsagawa rin ang PAWS ng libreng responsible pet ownership seminar sa mga indigent pet owners na naninirahan sa mga komunidad na malapit sa expressway.

"It is the first of its kind for an expressway developer to launch an animal welfare program," ani Ms. Anna Cabrera, Executive Director of

PAWS.

Christmas gift-giving

Ang pagdiriwang ng Pasko ay tungkol sa pagmamahal at aruga. Sa pamamagitan ng "Paskong Saya Handog ng MPT South", nakapagbigay ngiti at ng pag-asa ang toll road company sa 300 disadvantaged children sa pamamagitan ng pamimigay dito ng munting regalo at ilang mga goodies sa ilang komunidad sa Silang, Cavite at Santa Rosa, Laguna.

"Ang paglunsad ng iba't ibang community programs para tumugon sa mga pangangailangan ay aming paraan upang maipakita ang aming pasasalamat, buong puso po namin at ng aming volunteer employees na iaalay ang aming oras at kalinga para sa aming mga komunidad at motorista at kasing halaga po nito na aming unti-unting naabot ang aming mga sustainability goals for progress, people and planet" ani Ms. Arlette V. Capistrano, MPT South Spokesperson and Assistant Vice President for Communications and Stakeholders Management Division.

Ang MPTC ay ang pinakamalaking tollway builder at operator sa bansa. Bukod sa CAVITEX, CAVITEX C5 Link, at CALAX, hawak rin ng MPTC ang concession

Silang, Cavite ang nabigyan ng libreng mga vitamins at medical consultation sa serye ng "Alagang MPT South Medical Mission".

Road safety seminars

Bukod sa paghahatid tulong sa iba't ibang komunidad, nagpapatuloy rin ang toll road company sa pagsulong ng road safety at pagpapakilala ng mga safety features ng expressway. 474 na mga drayber ang sumailalim sa award-winning 'Drayberks' road safety seminar. Ibinida rin ng toll road

company sa 160 kabataan ang kaalaman sa road safety sa pamamagitan ng paglunsad sa Bayani ng Kalsada o "Bayani Ka" activity book, isang interactive at comic inspired na libro na tiyak na kagigiliwan ng mga ito.

DPWH heeds PBBM directive to build bridges, farm-to-market roads to make life easier for farmers, common folks

The Department of Public Works and Highways (DPWH) has heeded the directive of President Ferdinand R. Marcos Jr. to make life easier for common folks as the agency continues to build, upgrade and rehabilitate bridges, flood control structures and school buildings.

Through a budget provided by the Department of Agriculture, the DPWH built some 75 kilometers of farm-to-markets roads from July to November this year as

part of President Marcos' pledge to help farmers transport their harvest to public markets.

To ensure the unhampered transport of goods and services in the provinces, the DPWH built, upgraded, and rehabilitated a total of 112 bridges, 650 flood control structures as well as 2,575 school buildings for use of public school students.

The DPWH has also played an active role in disaster response like what it did in the aftermath of the magnitude 7.3 earthquake in Abra where the agency deployed thousands of personnel to help in the search, rescue and relief efforts.
